TCS Digital Interview

Interview – 1

TR & MR Round (Around 30 mins)

1. Introduce yourself
2. Explanation of the projects
3. Asked which language I am comfortable with (Java, but I did not do any projects in Java, so they asked me to explain the project briefly in Python)
4. What is the unique thing in the proposed project?
5. Asked to write an SQL query to select the first 10 records in a table
6. Asked which operating systems you have worked on (Linux, Ubuntu, and Windows; gave a small definition for all of them)
7. As I mentioned DSA, they asked basic definitions of Linked List and HashMap
8. Asked one question: If you have a million records and some of the records are being deleted in the middle, what will you use? (I don't know the exact answer, but I said Linked List and gave a small explanation)
9. What is a garbage collector?
10. Are you willing to work from office or home?
11. AI is evolving now, what do you think: should we learn AI or leave AI and do manual work?

HR Round (Around 20 minutes)

1. Again asked for a self-introduction
2. Talk about what you have done in your college other than academics for 3 minutes
3. Talk about a recent movie that I watched for 3 minutes
4. Tell about your family background
5. Asked hobbies other than academics
6. Talk about how you spend your time with your family
7. Willingness to relocate
8. Document verification
9. Asked about my preferred locations

Interview – 2

TR + MR Round

1. Self-introduction (clear, structured, and impactful)
2. Explanation of two projects with a detailed walkthrough, including code-level understanding
3. Justification for choosing Full Stack Development apart from AI
4. Explanation of career gap with clarity and confidence
5. Understanding of APIs (concepts, usage, and implementation)
6. Knowledge of Microservices Architecture
7. Can you describe the coding questions asked in the NQT and walk us through your problem-solving approach and logic?
8. Explanation of project flowchart and architectural layers (frontend, backend, database, integration)

HR Round

1. Reason for choosing Tata Consultancy Services (TCS)
2. Disclosure of current offers (if any)
3. Details about previous interview experiences
4. Handling team conflicts with real-time examples
5. Overview of knowledge about TCS (company background, services, values)
6. Flexibility and comfort with working on different technologies
7. Document verification process
8. Why Tata Consultancy Services
9. What do you know about TCS
10. Experience of handling team conflicts in real-time scenarios
11. Approach to managing team members during conflicts
12. Opportunity to ask questions to the interviewer

02/04/2026

TCS Digital Interview

Interview – 1

TR & MR Round (Around 30–35 mins)

1. Introduce yourself
2. Explanation of the projects
3. As my projects were based on frontend, they asked questions related to React
4. Since I selected Python in the application form, they asked Python-related questions
5. Questions on Python concepts: flag, generators, lists, tuples, and differences between them
6. Scenario-based coding questions in Python
7. Basics of DSA theory – sorting and searching techniques
8. Difference between Git and GitHub
9. Questions based on skills mentioned in my resume

HR Round

1. Why TCS?
2. Where do you see yourself in 5 years?
3. Do you have any offer in hand?
4. Questions about family background
5. Willingness to relocate anywhere

Interview – 2

TR & MR Round

1. Count of each number in the array
2. Reverse of the name
    - Example: john wick → wick john
3. Exception handling and related keywords

HR Round

1. Why TCS?
2. Tell me about a conflict in your team and how you handled it
3. Strengths and weaknesses

Interview – 3

Role – Digital | Tech – Python | Place – Coimbatore

TR & MR Round

1. Introduction
2. Explanation of projects and asked to write code related to the project
3. Exception handling
    - Explain with example and write code
4. SQL query
    - Retrieve the top 3 students who registered courses
5. Problem-solving skill questions
6. Scenario-based questions

HR Round

1. Do you have any offer in hand?
2. Why TCS?

Interview – 4

TR Round

1. Self Introduction
2. Fibonacci series
    - Initially wrote using a for loop
    - Then asked to implement using recursion
3. Sum of first n numbers
4. String comparison – difference between == and .equals()
5. Project explanation
6. Questions related to NLP (Natural Language Processing)
7. Questions about certifications
8. Basics of Redis and MongoDB

HR Round

1. Preferred three job locations
2. Questions about education background
3. What do you know about TCS?
4. Do you have any questions for us?

Interview – 5

Role – Digital | Tech – Python

TR & MR Round

1. Introduction
2. Python programs
    - Reverse of a string
    - Count the number of characters in a string
3. Memory storage in Python
4. REST APIs – basic concepts
5. MongoDB
    - Steps for data storage
6. Basics of Generative AI (Gen AI)

Note: Questions based on keywords mentioned in the resume

Interview – 6

TCS Digital Interview | TR & MR Round

1. Introduce yourself
2. Can you write an SQL query?
3. Write a query to fetch all details of the person who has the maximum salary
4. What is exception handling in Python?
5. Explain mutable and immutable data types in Python

Interview – 7 | Experienced Candidate

TR & MR Round

1. Discussion based on previous work experience (startup experience – 1.5 years)
2. Rate limiting – concept and usage
3. Indexing in databases
4. OFFSET in SQL
5. Vector database architecture
6. RAG (Retrieval-Augmented Generation)

HR Round

1. Why do you want to join TCS?
2. Will you leave TCS if you get a better offer?
3. Does your previous company provide PF (Provident Fund)?
4. General casual discussion

Candidate Suggestions / Insights

- Be strong with **sorting algorithms** and **binary search**
- If your tech stack is Python, learn:
  - NumPy
  - Pandas
- Prepare **in-depth project explanation**
- Interviews can be unpredictable – sometimes no theory, only experience-based questions
- If answers are not satisfactory, rejection may happen in the first round

---

TR
...

TR round they give some suggestions like u have to add java certificate it increases wait of the resume Edited 5:58 PM

I have a suggestion for prime interview candidates

-they ask every sorting method and binary search if ur tech stack is python u must learn numpys and pandas 6:10 PM

And also in depth project explanation 6:10 PM

If they not give best reject in first round 6:10 PM

TR + MR asala unexpected bro naku 1.5 years experience undi startups lo, so asala theory questions em adagale direct mottam experience gurinche adigaru 6:05 PM

konni theory points:

- rate limitting
- indexing
- offset in sql
- vector databases architecture
- RAG

6:05 PM
